Primary Examiner, Art Unit 3685

1. Claims 1, 4-6, and 7-24 are allowed.

***Reasons for Allowance***

2. The following is an examiner's statement of reasons for allowance:

Regarding the claimed terms, the Examiner notes that a “general term must be understood in the context in which the inventor presents it.” *In re Glaug* 283 F.3d 1335, 1340, 62 USPQ2d 1151, 1154 (Fed. Cir. 2002). Therefore the Examiner must interpret the claimed terms as found on pages 1- 44 of the specification. Clearly almost all the general terms in the claims may have multiple meanings. So where a claim term “is susceptible to various meanings, . . . the inventor’s lexicography must prevail . . .” *Id.* Using these definitions for the claims, the claimed invention was not reasonably found in the prior art.

3. The closest prior art of record is U.S. Publication No. 2003/0061170 to Uzo.

Uzo discloses a method and apparatus for making secure electronic payments. Uzo taken either individually or in combination with other prior art of record fails to teach or suggest providing one or more tokens to the foreign service provider with a next packet after the foreign service provider has verified the signature to use the service, wherein the one or more tokens are generated using the hash tree; and using the service while the foreign service provider accepts tokens as recited in independent claims 1, 4, 23 and 24; the processor to send the digital signature and the root value to the foreign service provider as a first packet, via the external network interface, along with one or more tokens with a next packet after the foreign service provider has verified the signature for use of the service, and use the service while the foreign service provider accepts tokens, wherein the one or more tokens are generated using the hast tree as recited in independent claim 14; Moreover, the missing claimed element from Uzo is not found in a reasonable number of reference(s).

***Conclusion***

4. The “computer-implemented method” claims satisfy the 35 U.S.C. 101 requirements for at least the following reasons: (1) in order to generate a digital signature, a computer/device must be utilized; thus, the claims are tied to another statutory class (2) the tie to an apparatus, is not merely extra-solution activity and (3) the steps are not purely mental steps.

5. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
